

ISPO Canada Symposium 2009

Prosthetics and Orthotics Care for People with Diabetes

October 22-24, 2009, Toronto, Ontario

The International Society for Prosthetics and Orthotics (Canada) 2009 Symposium will focus on prosthetic and orthotic care for our diabetic population. This three-day symposium will feature national and international experts in endocrinology, prosthetic and orthotic technology, and prosthetic and orthotic clinical care. Day one will provide access to manufacturer product workshops. Day two will feature plenary and prosthetic/orthotic specific presentations. Day three will consist of a series of workshops and round-table discussions. All members of the health care team, administrators, and research and development professionals will benefit from this symposium.

This year's slate of international experts come from the fields of prosthetics, orthotics, medicine, engineering, and biomechanics and come from USA, Netherlands, and Germany. The final program will be available on the ISPO Canada web site (www.ispo.ca).

The Symposium will be held at Sunnybrook and Women's College Health Sciences Centre, Toronto, Ontario, Canada.

The organizing committee welcomes the opportunity to meet you in Toronto.
