# ISPO Canada Symposium 2011

## Innovations in Prosthetics and Orthotics

September 30 – October 1, 2011  
Ottawa, Ontario

The International Society for Prosthetics and Orthotics (Canada) 2011 Symposium will focus on innovations in prosthetics and orthotics care. Innovations are not limited to new technologies, but encompasses clinical and global initiatives to improve P&O services. This two-day symposium will feature national and international experts from the full range of disciplines involved with prosthetics and orthotics. The Symposium will feature plenary and prosthetic/orthotic specific presentations, workshops, and round-table discussions. All members of the health care team, engineers, research and development professionals, and administrators will benefit from this Symposium.

The slate of international experts will come from the fields of prosthetics, orthotics, physiotherapy, engineering, and biomechanics and come from Asia, Europe, and the USA. The final program will be available on the ISPO Canada web site.

The Symposium will be held at the University of Ottawa, Ottawa, Ontario, Canada.

The organizing committee welcomes the opportunity to meet you in Ottawa.
